

ABSTRACT OF THE DISCLOSURE

~~To provide~~The invention provides a transmissive screen having low occurrence of light diffraction and ~~moire-fringing, moire-fringing, and also to provide~~ The invention also provides a rear projector including such a high-quality transmissive screen. A transmissive ~~screen~~screen, applied to a rear projector, ~~including~~includes a light-guide plate having substantially cylindrical light-guide spaces arranged in a flat substrate, and a light-exit-angle distribution uniformizing ~~means for making~~device to make the angular distribution of the light exiting from the substantially cylindrical light-guide spaces of the light-guide plate uniform over the transmissive ~~screen~~screen, ~~the~~ The light-exit-angle distribution uniformizing ~~means being~~device is provided at the light-exiting face side of the light-guide plate. The invention also provides a~~A~~ rear projector including such a transmissive screen.
